Working Spaces

Everything has its place: for many people life revolves around their home. It is where all aspects of life unfold: peace and relaxation have a place as do spending time together, doing the housework and working from home. Everything must be organised with due consideration of the functional and visual aspects. Our working spaces provide a number of different planning options that are suitable for any living concept and space availability.

Create fully equipped utility rooms with perfect solutions for managing laundry, recycling and storage space as well as integrated linear solutions for more limited layouts. A conventional pantry can even be given an attractive design with modular furniture and space-saving shelving, or an office can be optimally integrated into a room as a workspace.

Schüller solutions turn cold real estate into homely settings with a focus on all that makes life easier, nicer and more endearing.

Working from home

Wenn das Office ins eigene Zuhause verlagert wird, ist lösungsorientiertes Denken gefragt. Daher Relocating the office to the home requires solution-oriented thinking. Consequently, the task at hand is to optimally utilise the available space. For instance, files and the like disappear into the wall units with practical folding flaps and the base units, which can be provided with Tip-On or even extravagant leather handles. The stylish integration of a light into the Frame Racks or wall units positioned above perfectly illuminates the work area. The result is a perfectly planned workplace.

Utility room

Nice and tidy: the multifunctional utility room is the perfect solution for a clean home and provides a tailored workspace for laundry, cleaning, storage and recycling. It's a place where housework won't be such a chore. Whether in a separate room or as kitchen units, the modular concept is fully tailored to individual needs and offers a functional, ergonomic solution whatever your requirements may be. In the truest sense of the word, form follows function here and offers practical housekeeping solutions.

Pantry

Enjoyment at hand: the trend of open-plan living also poses various challenges when it comes to keeping basic provisions. Interior designs where the kitchen and living room merge into one require clever ideas for neatly and clearly storing utensils, food and other provisions without impairing the room's homely feel.

The pantry is the perfect place to efficiently tidy away everyday household items. Interior drawers and pull-outs, as well as different shelving elements, provide a good overview and a perfect storage space for supplies. Bulky objects or rarely used kitchen appliances can be stored on the practical corner shelves. Combined with the crate effect pull-outs, the cross dividers and Flex-Boxes, the pantry becomes a practical eye-catcher.
