 as well as built-
 in mood lighting,
 carcase height
 812.5 mm | Onyx
 black handle with
 leather cover |
 Cover panel made of
 vegan leather | With
 frame feet

DESCRIPTION

A versatile standalone unit: the new next125 sideboard with ultragrey glass fronts and English pull-outs adds a touch of opulence to any room. It is equally at home as an eye-catcher in the kitchen, dining room or living room, and offers numerous customisation options.

Painstakingly tailored to the next125 glass display unit, the surfaces beguile us with a mysterious elegance that's emphasised by the dark colouring. If desired, the sideboard can also be finished with a vegan leather mat and a new pedestal.

The concealed hinge technology and modern onyx black handle, optionally covered with leather, embody aesthetics through and through.

Matching feet and a sideboard base frame are also available. These enable our latest creation to fit in with the existing materials and colour scheme and blend in perfectly in the kitchen and living space.

Optional mood lighting can be built in to the sides of the carcase. The dimmable lighting with colour adjustment allows you to stylishly showcase all of your favourite belongings.
